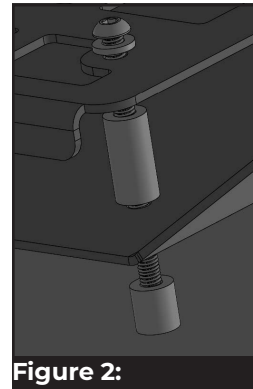

Figure 2:

- 3 Carefully align and thread the bolts from the previous step into the pre-existing holes in the tailgate (figure 2).
- 4 Insert the M6 X 50mm bolts through the molle plate and 1 inch spacers, and thread them into the preexisting holes in the tailgate (figure 3).
- 5 With the molle plate in place on the tailgate, go back and make sure the bolts are tight, including the three that hold the backing plate. All the bolts should be snug, but do not overtighten. The installed molle plate should look like the figure below.
